

LAV

## Embracing the change

As we embrace the opportunities and challenges of 2024, it is with great enthusiasm that I reflect on our journey and chart the course for the future. LAV, a proud member of the Gürok Group, continues to thrive in a world marked by rapid changes and evolving needs, particularly in the HORECA industry.

In an increasingly fast-paced and turbulent world, we have witnessed numerous global challenges, from health crises to economic shifts. These challenges have not only tested our resilience but also sharpened our focus on enhancing our living conditions and cherishing the moments with loved ones. In this context, our mission at LAV has been to infuse joy and innovation into every product we design, ensuring that they resonate with the evolving trends and needs of our customers.

2023 was a year of significant achievements and expansions. We proudly showcased our LAV collections at various prestigious events like Ambiente Frankfurt, The Inspired Home Show Chicago, NRAS Chicago, Züchex Istanbul, Host Milano, and Gastromasa Haliç, which all helped us to form new collaborations. Our commitment to design and innovation led us to introduce new designs and collections, specifically tailored to create inviting atmospheres in HORECA establishments. We expanded our product line for professionals, introducing tempered glass, increasing our range of stackable products, and enhancing our selection of fine-rimmed items. Our investment in production technology, including advanced machinery for double-piece wine glasses and plastic cap injection machines, has set new standards in the industry.

As we stepped into 2024, our focus on the HORECA market became more pronounced. We have successfully applied our retail strength and experience to this sector, rapidly expanding our presence and adding more value to the businesses and work environments of our HORECA partners. Our wide product range, which focuses on design and tailored solutions, strikes a unique balance between functionality and aesthetics, catering to the specific needs of the various HORECA establishments.

Sustainability remains at the heart of our operations. We manufacture 2 million pieces of glass daily in our two mega production facilities, which have a total covered area of 120 thousand square meters and an open-air area of 300 thousand square meters. We are constantly implementing efficiency measures to reduce our consumption and environmental impact, and as a result, LAV succeeded in cutting overall energy and water consumption by 9% over the previous year. Our commitment to diversity and inclusion has also seen a significant increase in the proportion of female employees in various roles within our company. We boosted the proportion of white-collar female employees to 49%, female executives to 14%, and total female employees to 17%.

The Gürok Group, with its 75-year legacy, continues to inspire us. Operating in diverse fields such as glassware, tourism, and construction, the group has always been a beacon of innovation and sustainable growth. As we mark the end of the Turkish Republic's 100th anniversary, we are reminded of the importance of our motto, "Act Brave, Do Good, Think Unlimited." This philosophy not only guides the Gürok Group but also deeply influences our approach at LAV, especially in our endeavors within the HORECA sector. Gürok Group's 33 years of experience in tourism and hospitality, from family-oriented resorts to well-being-themed and art-focused luxury island establishments, from turquoise Mediterranean coasts to crystal-clear Maldivian bays, helped us develop a very deep understanding of the core values and needs of the HORECA industry.

In 2024, we are more determined than ever to strengthen our influence in the HORECA industry. Our approach is two-sided: to continue innovating in product design and functionality, and to deepen our commitment to sustainable practices. We understand that the concept of sustainability has evolved from a mere trend to a global necessity, encompassing environmental, social, and economic aspects. This understanding shapes our product development, ensuring that each item we create is not only aesthetically pleasing but also responsible and mindful of its impact.

Our journey through glass, from design to manufacture and from shelves to tables, is a journey of continuous improvement and innovation. We are excited to offer our HORECA partners products that combine durability, hygiene, ease of use, and exceptional design. We believe that these qualities are not just desirable but essential in today's fast-evolving hospitality landscape.

As we move forward, our collaboration with global business partners remains a cornerstone of our strategy. We are stronger together, and our shared journey towards value creation and sustainable growth is more important than ever. We look forward to deepening these partnerships, exploring new opportunities, and facing the challenges of the future with confidence and optimism.

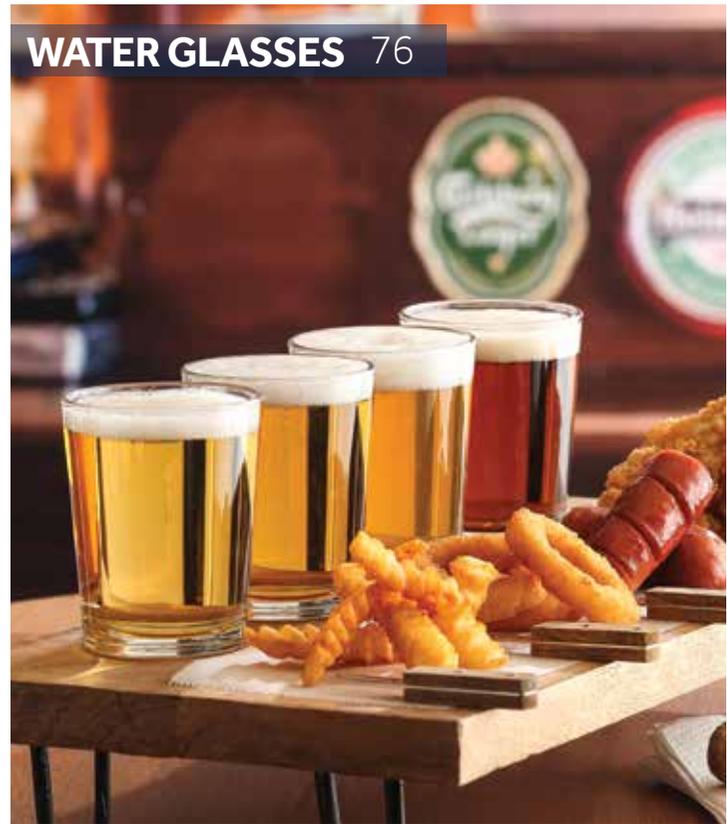

Thank you for your continued support and trust in LAV. Here's to a year of growth, innovation, and shared success in the HORECA industry and beyond.

## about LAV

Welcome to LAV where we turn inspiring moments into unforgettable memories! Our passion for glassware dates back to our foundation in 1994, and since then, we have been committed to delivering the best to our customers through innovation, sustainability, and technology.

We believe that every moment in life is worth celebrating, and that's why we have made it our mission to add color to people's lives with our innovative, original, and stylish glass designs. Our products, which range from tumblers to stemware and bowls to storage containers, are meticulously designed and manufactured to add value to any business or establishment.

At LAV, we take sustainability and the future of our world very seriously, employing environmentally friendly materials and implementing water and energy-saving measures. As a result of these perspectives and policies, we became the lowest water and energy consuming producer in our industry on a global scale.

Our team of 2,000 dedicated professionals works tirelessly to bring our products to customers across the globe. We have a robust sales and distribution network that spans over 135 countries, from the United States to China, and everywhere in between. With our two production facilities covering a combined area of 300,000 square meters, we have the capacity to produce 2 million pieces of glassware per day, making us the fifth-largest global manufacturer in our industry.

But we don't just value quantity over quality. At LAV, we are proud to be a local manufacturer with a global reach, and we are committed to delivering excellence in everything we do. Our research and development activities take place in our Technopark, where we are one of only three businesses in the world to develop our own production technology. Our top priority is to listen to our customers and continue to offer them innovations and solutions that are tailored to their specific requirements.

## innovation

At LAV, we place a high value on new ideas and technological advancements, and we have positioned innovation at the center of all departments with the help of our young workforce.

Adopting innovation and technology as a guiding principle, our R&D department is responsible for most of our innovative contributions. With our Technopark, we have become one of only three companies in the world to develop our own production technology in our sector.

## business partnerships

LAV focuses on each business partner's unique needs and provides the most appropriate, innovative, and creative solutions to these needs. It ensures that its business partners are involved in all processes through transparent and always open communication channels. LAV's goal is to support its business partners enhance their brand value, sales, and customer portfolio.

## culture

At LAV, we believe that a positive work environment that promotes free thinking and creativity while emphasizing knowledge, talent, and competence is the key to our success. We strive to provide all necessary conditions for our employees to develop themselves and become better professionals and individuals. From the recruitment process to in-house training and reward systems, we focus on empowering our employees and supporting their growth.

## production

### The world of innovative and sustainable production!

LAV, the world's fifth-largest glassware producer, is an internationally recognized brand with state-of-the-art production processes and a commitment to constant innovation. Our two leading mega-factories are capable of putting out 2 million units per day. Manufacturing doesn't stop at LAV with the delivery of goods to customers; under the concept of "factory in a factory" we also develop and produce our own machinery to guarantee the highest standards of quality and productivity. LAV is a globally recognized and respected brand, as evidenced by our exports to 140 different countries. Our commitment to sustainability is yet another way in which we stand out; we use significantly less water and energy than any other company in the glassware sector. We have over 2000 expert employees and take great pride in being a sustainable, innovative, and high-quality Turkish brand known and appreciated around the world.

## High standards

As LAV, we believe in the importance of achieving standardized results in all circumstances through a solid-based, integrated, and systematic approach, so that all of our customers and business partners have a transparent and flawless experience with us, regardless of their field of activity, size, or location in the world. In this regard, we obtained certifications with global validity on critical issues such as production, marketing, communication, licensing, and sustainability using a Total Quality Management approach in order to achieve the highest possible standardized results.

By holding these certifications, we're able to comply with regulations and requirements set by various industries and access new markets, allowing us to expand our reach and provide our clients with even more options. Our commitment to quality has not only given us a competitive advantage but has also helped us improve our efficiency and productivity, allowing us to provide better products and services at a more affordable price.

## BETTER THROUGH SUSTAINABILITY

*As we continue our sustainability journey, we are pleased to share our third sustainability report with you. Through this report, we aim to transparently reveal our approach to sustainability, including its environmental, social, and economic aspects, as well as how we integrate it into our business processes.*

The LAV Sustainability Report emphasizes the importance of addressing climate change and other environmental and social challenges in today's business world. Recognizing that success is no longer solely based on financial performance, LAV incorporates respect for people, nature, and a variety of other factors into its business model, including legal compliance, employee satisfaction, and digitalization. This approach is part of a larger sustainability strategy, which is necessary for managing the various components of modern business.

### **Our Sustainability Priorities**

LAV has adopted an agile, innovative, and environmentally conscious management approach in response to global changes, incorporating sustainability into its core business strategies. The company's "Journey through Glass" sustainability strategy for 2020–2025 outlines its priorities and aligns them with its vision, values, and corporate strategy. This includes focusing on risks and opportunities, as well as incorporating sustainability into business practices. LAV reevaluated its sustainability priorities in

2022, focusing on three main areas: "Better Company," "Better Products," and "Better World." LAV aligns these areas with specific UN Sustainable Development Goals (SDGs) and monitors progress through the LAV Sustainability Scorecard, which is part of its Balanced Scorecard and individual performance evaluation systems.

### **Our Support To Sustainable Development Goals**

Sustainable Development Goals (SDGs) are a universal call to action by the United Nations for governments, companies and non-governmental organizations to work collaboratively and take action in areas critical to the common future. The 17 global goals that have been determined serve to take the right steps today to improve life for future generations in a sustainable way. At LAV, we adopt and support the United Nations Sustainable Development Goals. We see our contributions to SDGs as an essential component of our sustainable value creation process. We contribute directly to the 7 sustainable development goals with the activities we carry out.

*LAV supports the United Nations Sustainable Development Goals and contributes to seven of them through various initiatives.*

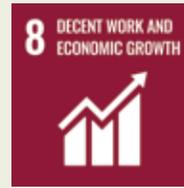

LAV prioritizes employee health and safety, adhering to high standards and offering training programs. The company also contributes to food sustainability through its product offerings.

The company invests in employee development and forms partnerships with universities, supporting education access for children through social investments.

LAV promotes women's participation in social and economic life, adheres to the UN Women's Empowerment Principles, and implements practices to increase female representation in its workforce and management.

The company boosts economic value through R&D and innovation, ensures fair labor practices in its supply chain, supports local procurement, and invests in social welfare.

LAV invests in low-impact, high-value products and collaborates in R&D. The company also focuses on producing its own machinery and digitizing processes in line with Industry 4.0.

LAV aims for resource-efficient production without compromising quality or safety, supports circular economy principles, and works towards reducing plastic use and increasing glass recycling.

The company actively participates in various sectoral, national, and global sustainability initiatives, believing in the power of collaborative action for sustainable development.

# A Journey through Glass

## A BETTER COMPANY

- ▶ Emergency Preparedness and Business Continuity
- ▶ Business Ethics
- ▶ Digitalization and Industry 4.0

- ▶ Resource Efficiency and Circular Economy
- ▶ Gender Equality

## BETTER PRODUCTS

- ▶ Environmentally Friendly Products and Food Safety
- ▶ Brand Awareness and Response to Consumer Expectations
- ▶ Product Safety
- ▶ R&D and Innovation

## stackable

### Stack up your style

Using innovation and technology as its guiding principles, LAV creates products and solutions within the scope of Technopark, where it conducts innovation and R&D studies that make businesses' lives easier. LAV not only manufactures glassware, but also creates design procedures, new technologies, and glass manufacturing machinery. Businesses may provide a secure and high-quality service to their customers and staff thanks to LAV's products. LAV creates its stacking and space-saving glasses to provide order and extra work space in busy establishments and heavily used spaces. With their easy storage and practical transportation options, the stackable goods we manufacture swiftly respond to the demands of businesses serving in compact spaces and locations with limited storage capacity. Furthermore, because they can be easily separated from one another, they do not slow down the workflow. We look forward to seeing how LAV products make your work environment comfortable and efficient.

LAV Istanbul

fine rim

LAV Paris, Vienna & Venice

## A sophisticated experience

LAV's fine-rimmed glasses, which have been perfected by cutting the rims with hydrogen, can provide several benefits to HORECA establishments. Fine-rimmed glasses are aesthetically pleasing and add an elegant touch to beverage presentation. They give the establishment a modern and sophisticated persona and create an upscale impression on customers. Drinking from fine-rimmed glasses is a pleasurable experience. The rim's smooth edge ensures that there are no rough or sharp edges to cause discomfort to the customer. They improve the drinking experience by directing the liquid to different taste areas in the mouth and taking the pleasure of drinking to the next level. Fine-rimmed glasses are lighter and take up less room than thicker-rimmed glasses. This is beneficial for HORECA establishments with limited storage space.

## tempered

### **An appealing durability**

Tempered glassware has several advantages for HORECA establishments. Durability occupies the top of the benefits list because tempered glassware is up to five times stronger than regular glassware. This makes it highly durable and resistant to breakage, even if it is dropped or subjected to heavy use. This durability translates into two strong advantages: cost savings and sustainability. Less breakage means less re-buying and less waste. Tempered glassware is designed to withstand sudden changes in temperature. This makes it ideal for serving hot beverages such as coffee, tea, and mulled wine. Even the harshest industrial dish washers have no negative effect on tempered glass. On top of those physical and financial benefits, tempered glassware has a unique feel and appearance that can enhance the presentation of beverages, making them more visually appealing to customers.

# STEMWARE GUIDE

## Serving volumes

## LAV Recommends

Rosé wine can be made from a wide range of red grapes, such as Grenache, Syrah, Pinot Noir, and Sangiovese. It gets its pink color from the skins of red grapes, which are briefly in contact with the juice.

LAV Paris, Vienna, and Zagreb are just a few of the LAV alternatives for serving Rosé.

The color of red wine can vary widely, depending on the grape variety, the winemaking process, and the age of the wine. Red wine is often aged in oak barrels, which can impart flavors of vanilla, spice, and toastiness to the wine.

LAV Valencia, Nice, and Lyon with larger bowls are excellent for most of the red wine varieties.

White wine is typically made from white grapes, but red or black grapes can also be used if the skins are removed before pressing. The reason white wine is typically served chilled is to enhance its refreshing, crisp flavors.

The narrower rimmed glasses like LAV Tokyo and Venice works great with fruity whites.

# STEMWARE

In the highly competitive HORECA industry, a positive customer experience and a solid brand image are built on the foundation of aesthetically pleasing and high-quality stemware. The right stemware can improve the customer's drinking experience by highlighting the beverage's aroma, flavor, and visual appeal. Stemware that is of high quality conveys an air of refinement and class, which is beneficial for your business. It has been shown that using high-quality stemware when serving alcoholic beverages can increase customer satisfaction and loyalty. By fully matching the diversity of the most comprehensive wine menus, our glasses, which we have perfected through detailed design processes, enrich the aroma and taste experiences of your customers and guests.

## **The beauty of consistency**

*Using varying sizes of stemware and tumblers from the same family of glassware throughout your establishment can create a consistent and cohesive look and feel, contributing to a more professional and polished image. Having the same model of glassware can make it easier for staff to identify and select the appropriate glassware for each beverage, reducing errors and improving efficiency.*

## Color is not everything

*Besides color, wine glasses can be categorized by taste and aroma. A narrow-mouthed glass will concentrate the aromas and flavors of light-bodied wines like Pinot Grigio and Riesling. For full-bodied wines like Cabernet Sauvignon and Syrah, a glass with a larger bowl and wider opening lets more air into the wine, releasing its full aroma and flavor.*

### **Different possibilities, various services**

*Red wine is typically served at room temperature, but the ideal temperature varies depending on the type of wine and your guests' personal preferences. Some red wines, like Pinot Noir, are extremely temperature sensitive and should be served slightly chilled to bring out their best flavors. Not all wines are meant to be aged; for example, some red wines, such as Beaujolais Nouveau, are meant to be consumed young.*

Fine rim 

### Fine rim, finer service

In the HORECA industry, the word "fine" carries a unique and profound meaning, defining a philosophy of healthy eating and drinking. While it may not be a practical option for most establishments, there is value in elevating certain aspects of your venue to the realm of "fine dining". At LAV, we offer reliable and proven recommendations in every category, including our fine rim glassware, which allows your visitors to experience the finery of genuine and approachable settings.

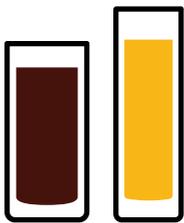

**BESTIE**

**MOOD**

# TUMBLER GUIDE

## LAV Recommends

Carbonated beverages should be served in tall glasses with a small mouth. This reduces the surface area of the drink, which helps to preserve the bubbles and keeps it from going flat too quickly.

LAV Rotterdam and Athens are all-around vessels that are great for beverages with gas.

You can't go wrong with a classic design in thick glass that holds both warm and cold drinks for anything from water, juice and milk to even coffee or tea.

The iconic designs like LAV Amsterdam and Nova always make serving easier.

With their easy storage and practical transportation options, the stackable LAV glasses like LAV Istanbul and Manchester swiftly respond to the demands of businesses serving in compact spaces and locations with limited storage capacity.

# TUMBLERS

LAV is a design-driven company that keeps form and function perfectly balanced. Our corporate creative spirit believes in flexibility and seeks multifunctionality. Multifunctional tumblers can serve multiple functions, requiring fewer items to store and manage in your establishment. In a busy kitchen, this adaptability can help save valuable storage space. You can save money by purchasing fewer items and lowering your overall inventory costs if you have multifunctional tumblers. This versatility can help your staff serve drinks more quickly and efficiently. They also don't have to keep track of different types of glasses for different drinks. This saves time and reduces the possibility of serving the wrong drink in the wrong glass.

## Beyond borders

Arak, Raki and Ouzo are siblings from neighboring cultures that share strong similarities and nuances. Although there are different fruits as base, grape is a common raw distillation material paired with aniseed for distinctive aroma and flavor. They are usually mixed with water and through this mixture, the beautiful foggy white color emerges. All three are best served with various meze which are tiny portions of dishes.

# WHISKEY GUIDE

## Serving volumes / Servis hacimleri

## LAV Recommends

### Single Malt

Single malt is made from 100% malted barley, distilled at a single distillery in Scotland. It's aged in oak barrels for a min. 3 years and has a distinct flavor influenced by the water and peat used.  
*LAV Lyon and Manchester with narrow rims with larger bowls are ideal for single malts.*

### Blended Scotch

Blended Scotch is a blend of single malt Scotches from various distilleries, aged for at least 3 years in oak barrels, and has a variety of flavors depending on the blend.  
*LAV Helsinki and Bologna will work for both neat and on-the-rocks blended Scotches.*

### Bourbon

Bourbon is a type of American whiskey made from at least 51% corn and aged in new, charred oak barrels.  
*Glasses with both wide bottoms and rims LAV Osaka ve Athens go well with bourbons.*

### Rye

Rye is a type of whiskey made from at least 51% rye grain and aged in oak barrels, with a spicy and sometimes fruity flavor profile.  
*Short and wide glasses with a heavy base, like LAV Amsterdam and Glasgow allow muddling and serving over ice.*

## WHISKEY GLASSES

When choosing whiskey glasses for a HORECA establishment you want to consider several factors to ensure that you select the right type of glassware for your guests. Whiskey glasses come in different sizes, larger glasses may be better suited for whiskey cocktails, while smaller glasses are ideal for neat pours or whiskey. The shape can affect the aroma and taste of the whiskey, so it's important that your glasses should complement your whiskey menu. For example, a narrow rimmed glass like Manchester is good for scotch whiskey, while a straight-sided glass as Glasgow is better for bourbon.

# BEER GUIDE

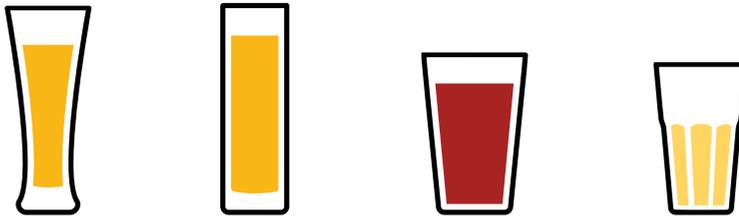

## LAV Recommends

### LAGER BEERS

#### American Lager, Pale Lager, Pils, Amber & Dark Lager

Lager is a type of beer that is brewed with bottom-fermenting yeast and fermented at lower temperatures, resulting in a cleaner, crisper taste than other types of beer.

The most common glassware used to serve lager is a tall, narrow glass known as a pilsner glass, which helps to highlight the beer's clarity, color, and carbonation while also preserving its foamy head.

LAV Munich LAV Rotterdam LAV Helsinki LAV Amsterdam

### ALE BEERS

#### Pale Ale, IPA, Stout & Porter, Belgian Strong Ale, Trappist, Abbey

Ale is a type of beer that is brewed using top-fermenting yeast, which ferments at warmer temperatures and produces a fuller, fruitier flavor compared to lagers.

The most appropriate glassware for serving ale is typically a nonic or a tulip type of glass both of which have a slight bulge near the top that allows the aroma and flavors to be better concentrated and captured, enhancing the drinking experience.

# BEER GLASSES

Having a variety of beer glasses to match different types of beers can improve the drinking experience for customers as well as the image of your establishment. The aroma and flavor of beer, as well as the amount of carbonation and head retention, can all be influenced by the shape of the glass. Providing the proper glassware for each type of beer can demonstrate to customers that you care about their experience and contribute to their overall satisfaction with your establishment.

# A DASH CREATIVITY

With LAV's innovative HORECA products, you can dazzle your customers and make them fall in love with your extraordinary presentations.

LAV Detroit

LAV Cadiz

By matching different sizes of Cadiz, which have shown to be a successful beer glass, with Old Fashioned and whiskey, you may create a laid-back atmosphere that bends the norms.

Every beverage and drink is served in glasses with standard sizes and shapes. However, in the HORECA industry, where competition is fierce and standing out is difficult, blindly adhering to these norms can create a stereotypical image in the eyes of customers and guests. For some reason, the focus on design and differentiation in the venue and menu designs can be overlooked in beverage services. When you let your creativity run wild, you can meet your customers with unexpected services that will entice them. If you know your drinks, spirits, and cocktails well, you can serve them in unexpected glasses without compromising the product's taste, smell, visibility, or temperature.

True creativity involves looking beyond form and function. LAV Detroit demonstrates how a modern storage product can be transformed into a stylish and one-of-a-kind service product. This is more than just multifunctional!

Looking beyond the generic description of a dessert service and evaluating its form and potential functions, it is easy to see how accurate and entertaining a serving instrument it is for some cocktails.

LAV Florence, Malibu & Santiago

LAV Seoul

You don't need a large portfolio of innumerable beers or an inventory of dozens of glass types that are difficult to reach and store in various sizes to create an appealing beer tasting menu. Being creative with the glassware can add an extra dimension of interest to the tasting experience, and a variety of glasses other than traditional beer glasses can be used to showcase the unique characteristics of each beer.

Two cocktails are presented on a blue tablecloth. The cocktail on the left is a light blue drink in a coupe glass with a red sugar rim. The cocktail on the right is a red drink in a martini glass with a white cream top and a cherry garnish. The background is a blurred party scene with warm lighting.

**PARTY**

A man and a woman are dancing in a party room. The woman, on the left, has purple hair and is wearing a red top and denim jacket. The man, on the right, is wearing a white patterned shirt and is holding a microphone. The room is decorated with a blue sofa, a framed picture, and a door. The scene is lit with warm, bokeh-style lights.

**MOOD**

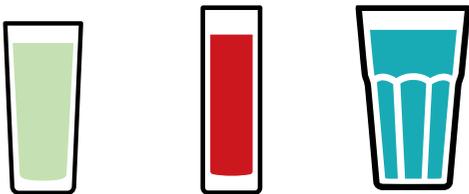

# COCKTAIL GUIDE

LAV Recommends

## COLLINS & HIGH BALL 95

G&T, Long Island Ice Tea, Mojito, Tom Collins, Cuba Libre, Bloody Mary...

This group of glasses is suitable for cocktails topped up with soda or tonic and for high alcohol recipes. They are also preferred for serving cocktails with rich content or that have high volume.

## FOOTED 98

Dry/Dirty Martini, Manhattan, Cosmopolitan, Side Car, Margarita, Frozen Cocktails...

They're ideal for low-volume cocktails like martinis, frozen cocktails and beverages, shaken or stirred cocktails, and drinks made with crushed ice.

## ROCKS & LOW BALL 100

Negroni, Mai Tai, Whisky Sour, Old Fashioned...

These glasses are typically used for whiskey, but they are also appropriate for some classic cocktails mixed in a shaker or stirred. When cocktails are served with ice chicanos or clear ice, the medium-sized glass easily accommodates both the drink and the ice.

## COCKTAIL GLASSES

A diverse cocktail menu is essential for a HORECA establishment, especially if you want to attract guests looking for a one-of-a-kind and memorable experience. Cocktails are a popular choice among many customers because they provide a diverse range of flavors, textures, and ingredients that can appeal to a wide range of tastes and preferences. Offering a diverse cocktail menu can also help you stand out from the crowd, especially if you have signature drinks or unique creations that customers can't find anywhere else. Proper glasses are also required for a diverse cocktail menu in a horeca establishment. The glassware you use can influence not only the appearance of the cocktail but also its flavor, aroma, and overall drinking experience.

# COCKTAILS WITH JOY

Looking for the perfect cocktail? Look no further than LAV glasses. With our expertly crafted recipes, your drinks will always look and taste amazing. Make it with love and let your guests enjoy!

LAV Edinburgh

LAV Osaka

Negroni

## Shots

Shot glasses of various sizes and shapes are essential for any bar that serves not only neat shots but also cocktails and other mixed drinks. These glasses typically hold one to two ounces of liquor, making them ideal for serving shots and measuring out ingredients for drinks.

## Mugs & Cups

Glass mugs & cups have lots of advantages when it comes to serving coffee especially if they are modern and stylish as ours. The transparency of a glass mug allows your customers to appreciate the rich color and texture of their coffee, enhancing the overall sensory experience. Glass is an excellent insulator, which means that glass mugs and cups can help keep coffee at the desired temperature for longer. The glass also heats up quickly, which can prevent the coffee from cooling too rapidly.

A woman in a red dress and hat is smiling and holding a glass of red wine. The scene is set against a blurred cityscape background. The image is split horizontally, with the top half showing the woman and the bottom half showing a reflection of her. The text "DISCOVERY" is overlaid on the top half, and "MOOD" is overlaid on the bottom half.

## Bowls

Glass bowls have a sleek, modern look, which adds an element of sophistication to your establishment's image. The transparency of the glass allows your customers to see the food and textures inside, making your servings more visually appealing. Glass bowls come in a wide range of shapes and sizes, making them a versatile choice for any HORECA establishment. They can be used for serving anything from salads and desserts to soups and stews, and they can be easily adapted to suit the needs of your menu. Glass bowls are less likely to chip or crack compared to ceramic or porcelain ones, which can save you money in the long run. They are also less likely to retain food stains and odors than ceramic or porcelain ones, which can help maintain a hygienic environment in your establishment.

## Jugs, Carafes, Bottles

Glass carafes and bottles in a buffet or breakfast service are an excellent way for hotels to improve the guest experience while reducing waste. Hotels can use glass carafes and bottles in a buffet or breakfast service to provide a more upscale and elegant presentation of beverages such as juices, milk, and water. To provide a more high-end and sophisticated look, hotels can serve juice in glass carafes rather than plastic containers or pitchers. LAV's glass bottles are suitable for storing milk, almond milk, soy milk, and other non-dairy milk substitutes. Toppings for cereals and yogurt, such as nuts, dried fruit, and granola, can be displayed in glass jars or bottles.

## Food Storage & Jars

In recent years, the food industry has come under increased scrutiny for its use of plastic packaging and its environmental impact. LAV's glass containers and jars are ideal for restaurants looking to reduce their environmental impact while maintaining the highest levels of food safety and quality. Our glass containers are made of high-quality materials and are designed to keep the food fresh and insulated, whether for leftovers from guests or for delivery. By switching to glass containers, you will not only be helping the environment, but you will also be showing your customers that you care about their health and well-being. Glass is a safer and more hygienic option than plastic, and our containers are dishwasher safe and can be used time and time again.
